

## Press Release

### WOLF-Garten

## Powerhouse for any Lawn

### Unique vibration reduction system

The new WOLF-Garten Expert petrol lawnmowers are real powerhouses. A galvanised steel/aluminium chassis, which makes the lawnmower more sensitive when under heavy strain, was specially developed for this series. The integrated vibration reducing system, through which the uncomfortable vibrations are reduced, is unique.

Forward-looking research ensures progress: the high-tech gel VIBEX made of polymers and synthetic hydrocarbonates reduces vibrations highly effectively by up to 75 %.

Handling the new mower has been simplified by ergonomically formed control elements and a number of other well-thought-out plus points. In this way they do not interfere with any holm elements and the collecting sack can be removed without straining the back. The central height adjustment is made easy as it is spring-loaded.

The stable steel chassis is doubly protected against corrosion by a high-quality underside galvanic coating and an additional power coating. A specially constructed mulch and collecting case connects both features optimally and ensures the best results. Double ball bearing mounted wheels with a new tread design ensure the lawn remains undamaged.

## Press Release

The extra stable steel/aluminium front means the mower is equipped for more difficult tasks. A dethatcher improves the condition of the grass.

Special, high-performance 140 to 190 cm<sup>3</sup> Briggs & Stratton engines from 2.1 to 2.8 kW provide the necessary thrust on lawns from 500 to 2000 m<sup>2</sup>. The configuration with one-gear or vario transmission is power saving.

The WOLF-Garten EXPERT mowers are available in cutting widths from 42 to 53 cm with central six position height adjustment from 2.8 to 9.2 cm. They can only be purchased through trade distributors and cost between €559 and €949.

Further information about on this subject can be obtained from WOLF-Garten, c/o MTD Products AG, 66192 Saarbrücken.
